

STUDENT HEALTH SCREENING AND IMMUNIZATION

The College shall require students involved in clinical experiences in allied health programs, practicum experiences in education and child care programs, and students who are members of intercollegiate sports teams to provide written documentation of immunization and/or health screenings consistent with legislation and industry specific best practices.

Students may receive an exemption from the above either by 1) signing a waiver of the requirements for immunizations or testing on the basis of religious convictions, or 2) receiving a medical exemption verified from a health care provider.

Procedures shall be developed to implement this policy.
