

AP 3412 Open-Access Locker Rooms

References: None

Purpose: This procedure addresses Clatsop Community College's responsibility to provide safe, secure locker room locations for all Clatsop Community College students and invited guests.

In alignment with its core values, the College commits to welcoming, valuing, and promoting diversity among staff, students, and invited guests and cultivating a respectful, inclusive, and accessible working and learning environment. Providing and maintaining access to single-stall open-access locker rooms is a key component of this commitment.

Open-access locker rooms provide safe, secure locations for a wide variety of individuals for whom traditional multi-stall gendered locker rooms are inadequate or unsafe, including students, staff and invited guests who are transgender, non-binary, gender-nonconforming, or queer, as well as those whose health, mobility, religious, family, parenting, or other needs are not met by multi-stall gendered locker rooms.

Under this policy, and in alignment with the concepts of universal design, the College will ensure that:

- All single-stall locker rooms currently on the College's campuses are labeled as open-access.
- Clatsop Community College staff, students, and invited guests will have access to locker rooms designated as open-access without question or restriction when complying with the posted rules and regulations.
- Campus and building information maps posted in buildings will indicate the location of the open-access locker rooms.
- All online and printable campus building maps that include designations for open-access locker rooms will also include marked designations for open-access options.

Definitions:

Open-access locker rooms: Locker rooms with showers that are available and accessible for use to all Clatsop Community College staff, students, and invited guests, regardless of identity.

Joint Policies & Procedures Committee Approved: December 11, 2024
